CAUTION: External Email

My comments on top of Sue's comments. Neil, if I missed something can you text me as I'm not near my desk.

Most imp't point is ensuring the land use ref to spillover is to "emerging zoonoses" -- Spillover of E.coli, salmonella etc is a daily phenomenon and driven by behavior and farming, cooking/slaughter/biosecurity practices... land use specifically drives spillover of emerging zoonoses.

Very well written and clear commentary! Nice work! Thanks for your leadership, Neil.

This time with the attachment.

On May 1, 2022, at 12:14 AM, Neil Vora <nvora@conservation.org> wrote:

Hi everyone,

Thanks so much! See attached for latest draft. Lucy sent me a text yesterday (Saturday 4/30) asking if we could send her the manuscript today (Sunday 5/1) instead of Monday 5/2. So, I plan to send it to her at 11.30am Eastern on Sunday 5/1.

Before I do, I was hoping that:

1. Sue could review before 8am Eastern on Sunday 5/1 (though I know Sue is busy right now, which may make it difficult for her to review); Sue, as you review, note that I tagged some comments to you by spelling out your full name "Susan"
2. Ari could review some of the minor comments tagged to him by 11am Eastern; Ari, comments to you use your full name "Aaron"
3. Raina could review some of the minor comments tagged to her by 11am Eastern

Thanks! We are almost there!

Neil

Hi,

Here are my edits. Apart from answering comments and a couple of wordsmithing things, only one significant change.

I added [REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED] This is important enough to
ask Lucy for the extra word count.

Sue and Raina - over to you. Neil says Lucy is on the warpath on word count and all comments have been addressed so this should be a quick read-through for any stray cats we may have missed and

hopefully will not take much time since you both have other things going on.

Cheers,

Lee

Dear colleagues,
Here is the file with my response to comments.
I don't think we need to mention Bill Gates' Ted Talk. It is just a talk; irrelevant in comparison to the WHA's global agreement on "strengthen pandemic prevention, preparedness, and response" or the CBD that we discuss in the paper.
Thanks, Neil, for all your hard work on this piece. It came together very nicely.
Best,
Marana

Hi folks,
Let's try to coordinate a bit this offline work to avoid having multiple parallel versions. So, I will start working on the file right now, and will return it in less than one hour and a half from now. It is late now in the US; that's the good side of having people in different time zones.
Best,
Mariana

Hi team,

Thank you all so much for your attention to this manuscript over

the past few days! I sent it to Lucy earlier today and she already sent her feedback. See attached for the latest version, which includes some of Lucy's comments (as in-line text) as well as my own latest edits (my edits are tracked).

Can you please do the following by Sunday 5/1/22 at 8am Eastern:

- Send your feedback on the manuscript
 - This is basically your last chance to review this before it goes to production!!
 - As you review, please do a search for your name or for "everyone", as I have tagged comments to individuals or to the group. Please address all comments tagged to you/everyone!
 - Make sure you do a thorough fact check throughout the manuscript!
 - Let me know if you think we should add a sentence about the recent Bill Gates TedX video, which makes no mention of spillover prevention (no surprise); the TedX video can be found here: <https://www.youtube.com/watch?v=B5smctuV7-Q>
- Send me an email that says: 'I agree to be co-author on the manuscript "Want to

prevent pandemics?
Stop spillovers”

I apologize that some of the references you all wanted to include didn't make it in, as we are already over the reference count.

The plan is for this to get published on 5/19... Lucy will see if this can get published online sooner than that.

Thanks!!

Neil
